Business Technology. Affordable Monthly Rentals.

IP TELEPHONES
& BUSINESS COMMUNICATION

CCTV
& BUSINESS SECURITY

LTE ROUTERS
& CONNECTIVITY

UPS
& POWER BACKUP

COPIERS & PRINTERS

Business technology without the upfront capital expense.

Flexible equipment rental solutions designed around your business requirements.

Why rent instead of buy?

Smart businesses manage their cash flow.

Purchasing telephones, CCTV systems, printers and networking equipment can require a substantial initial investment.

OrbX Rentals gives businesses another option.

The benefits of renting:

- **Preserve cash flow:** Avoid paying the entire equipment cost upfront.
- **Predictable monthly costs:** Budget for agreed rental payments.
- **Professional installation:** Installation and configuration can be included where agreed.
- **One point of contact:** Deal with OrbX for your contracted equipment and associated services.
- **Support options:** Select an appropriate maintenance and support package.
- **Equipment suited to your needs:** Choose the equipment that fits your business and budget.

Why tie up your capital in equipment when you could put it to work growing your business?

IP Telephones & Business Communication

Professional communication without the large upfront cost.

Equip your office with professional IP telephones through an affordable monthly rental arrangement.

Equipment options:

- IP telephone handsets.
- Reception and switchboard telephones.
- Selected telephone system equipment.
- Compatible accessories and associated hardware.

Ideal for:

- Small and medium-sized businesses.
- Reception areas.
- Offices with multiple employees.
- Businesses opening new branches.
- Companies replacing ageing telephone equipment.

A possible package:

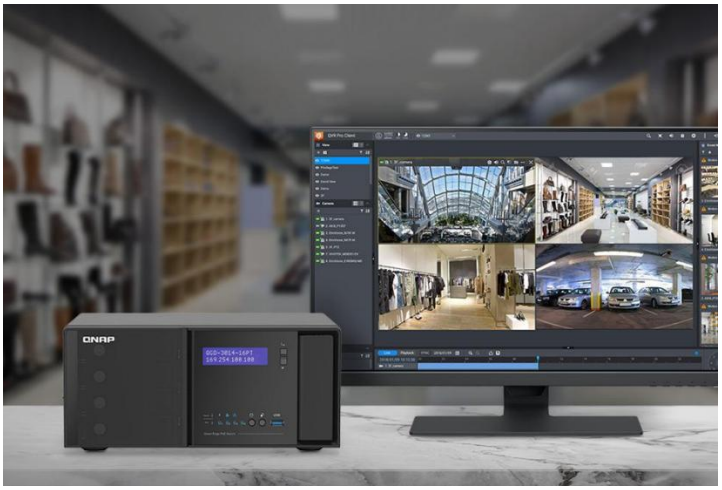

Office Communication Package

Rent the required handsets and agreed telephone equipment for a fixed monthly amount.

Optional Cloud PBX services, calling plans, installation and technical support can be quoted separately or incorporated into a package where appropriate.

I would emphasise that OrbX understands telecommunications, rather than presenting this as a generic equipment rental offering.

CCTV & Business Security

Protect your business without the large initial expense.

A CCTV system can be a significant purchase, particularly when multiple cameras, recording equipment, storage and installation are required.

OrbX Rentals could offer agreed CCTV equipment under a monthly rental agreement.

Potential rental equipment:

- Indoor and outdoor cameras.
- Network video recorders (NVRs).
- Digital video recorders (DVRs).
- Storage and associated equipment.
- Other compatible CCTV hardware.

Suitable for:

- Retail shops.
- Offices.
- Warehouses.
- Workshops.
- Small commercial premises.

LTE Routers & Connectivity

Keep your business connected.

Businesses increasingly depend on reliable connectivity. OrbX Rentals could make suitable LTE and 5G routers available without requiring the customer to purchase the equipment outright.

Rental equipment could include:

- LTE routers.
- Compatible 5G routers.
- Selected business connectivity equipment.
- Associated antennas or accessories where required.

Potential uses:

- Small offices.
- Retail premises.
- Temporary offices.
- Backup connectivity.
- Branch locations.

Equipment rental does not automatically include internet data or connectivity services.

UPS & Power Backup

Keep essential equipment powered.

Power interruptions can affect telephone systems, networking equipment, computers and other essential business devices.

OrbX Rentals could provide suitable UPS equipment under a monthly rental arrangement.

Possible equipment:

- Desktop UPS units.
- UPS units for networking equipment.
- Selected rack-mounted UPS equipment.
- Compatible backup accessories.

Copiers & Printers

Professional printing. Manageable monthly costs.

Printers and photocopiers can be expensive to purchase, particularly for businesses that need multifunction equipment.

OrbX Rentals could provide selected printers, copiers and multifunction devices under a monthly rental agreement.

Equipment options:

- Business laser printers.
- Multifunction print, copy and scan devices.
- Office photocopiers.
- Selected colour printing equipment.

Option A: Equipment-only rental

The customer pays a fixed monthly rental for the machine. Toner, paper, maintenance and repairs are handled according to the agreement.

Option B: Managed printing package

The customer pays an agreed monthly amount that may include equipment, maintenance and a defined printing allowance.

Additional charges apply according to the agreed terms.

The second option could be attractive to customers, but you would need to calculate toner, servicing, parts and expected print volumes carefully.

Rental plans and how it works

Rental option	Potential purpose
36 months	For customers who prefer a shorter commitment
48 months	A middle-ground option
60 months	A longer-term agreement with potentially lower monthly rentals
