

Welcome to Callryt

Communication That Actually Works (and Doesn't Make You Want to Scream into the Void)

Tired of dropped calls, patchy Wi-Fi, and business tools that work about as well as a potato taped to a string?

You need Callryt — your all-in-one, no-nonsense, yes-we're-serious, communication dream team.

We wrangle VoIP chaos, tame wild Wi-Fi and zap boring, expensive phone systems into glorious, cloud-powered masterpieces.

Let's break it down:

VoIP Solutions

We bring your voice into the 21st century with crystal-clear, internet-powered calling that actually makes you sound professional (even if you're still in your slippers).

- Cheaper than traditional phone lines
- Scalable, reliable, ridiculously easy
- No more "Can you hear me now?" moments

Cloud PBX

Your office phone system, now with actual superpowers.

Our Cloud PBX is like a switchboard operator from the future:

- IVRs and auto-attendants
- Complex call flows (think: ninja-like call routing)
- Hunt groups (team ringing madness, but make it efficient)
- Voicemail, and Voicemail to email options
- Call forwarding (for those moments when you just have to step away from the desk)

The Callryt App

Your office line, in your pocket — minus the actual desk.

Take calls from anywhere. Like a boss. On a beach. Or in a queue. Or mid-coffee-run.

But the real kicker?.... Call transferring! That means your receptionist can grab the call and send it straight to you without saying, "I'll just take a message."

It's like WhatsApp... if WhatsApp got a suit, went to business school, and knew how to forward calls like a pro.

Fibre & LTE

The "Oh wow, my internet actually works" kind of connection.

We hook you up with fibre and LTE that's faster than your office gossip.

Whether you're glued to a desk, running a pop-up shop, or hiding in a basement with three routers and a dream — we've got the speed and uptime to make your business boom.

Wi-Fi Solutions

Wi-Fi so strong, your cat can stream too.

From hotels to truck stops to your mom's kitchen, we create Wi-Fi networks that Just Work.

Full Wi-Fi management systems for busy spaces.

Mesh Wi-Fi for homes and smaller setups — banish dead zones forever.

Bandwidth control, guest logins, and analytics to keep your network tight and tidy

No more hiding behind the microwave to get one bar of signal with your hands up in the air like you're at a concert.

CCTV Systems

Security that doesn't blink — Keep eyes on everything. Get HD footage, remote access, and peace of mind that even Kevin from accounting can't price out.

Telephone Management System

Call tracking for grown-up businesses. Track calls and slash costs. Whether you're managing a 100-line call center or just want to know why Jeff's phone bill is so high, this is your secret weapon.

Why Choose Callryt?

Award-Winning Service – Our trophy shelf is real, and so is our obsession with making customers happy.

We Host Our Own Cloud – We don't rent space in someone else's cloud. We've got our own. Fancy, right?

Yealink Partnership – Hardware and service so sleek, even your grandma will want one.

Ridiculously Good Support – Real people. Real help. Real fast. (No robots named "Chad" who ask if you've tried restarting.)

Step Into the Magical World of Callryt

Where the tech works, the people care, and service is a passion.

Let's make your communication setup the best thing since Wi-Fi itself.
